NOTICE.

. . . OUR GOODS . . .

Are selected with great care and are of the best makes, and meritorious novelties will be, from time to time, added to our present line, our aim being to carry a complete stock of first-class Builders' Hardware.

. . . OUR PRICES, . . .

Quality considered, speak for themselves, but are not guaranteed and are subject to fluctuations of the market, without notice.

Gross or dozen prices apply to quantities of not less than one-half gross or one-half dozen only, as the case may be; smaller fractions will be charged at the advanced list named in catalogue. Other prices apply only to the quantities given.

Orders will be executed promptly at current rates, to the extent of our stock on hand, but such portions as may necessitate additional shipments are subject to prices ruling on date of invoice.

. . . OUR TERMS . . .

Are net cash, 30 days, except where parties are unknown to us, or are not rated in the commercial agencies, in which case they are positively C. O. D. When goods are sent by express, C. O. D., collection charges will be added to bill, an expense which can readily be avoided by sending money with order. C. O. D. orders must be confined to territory within a limited radius of New York, and under no consideration will goods be sent C. O. D. to Canada. Express companies will not accept C. O. D. packages on which the amount to be collected is less than \$1.00.

For one cent per ounce, or fraction thereof, parcels can be sent by mail to any part of the United States, but the weight of such packages must not exceed four pounds. Goods so sent are invariably at consignee's risk and at his expense for postage.

HAMMACHER, SCHLEMMER & CO.,

ECLIPSE DOOR CHECKS AND SPRINGS.

Eclipse Door Checks are packed with detachable and adjustable bar, so that the same Check can be applied to either the door or casing, and can be adjusted to doors of different widths in their frames. The Spring can be applied to either right or left hand doors, has an adjustable tension, and yields the most power when the door is closed, the power gradually decreasing as the door opens. All parts are interchangeable, so that in case of breakage the parts can be obtained at small expense.

Norton's Door Check and Spring.

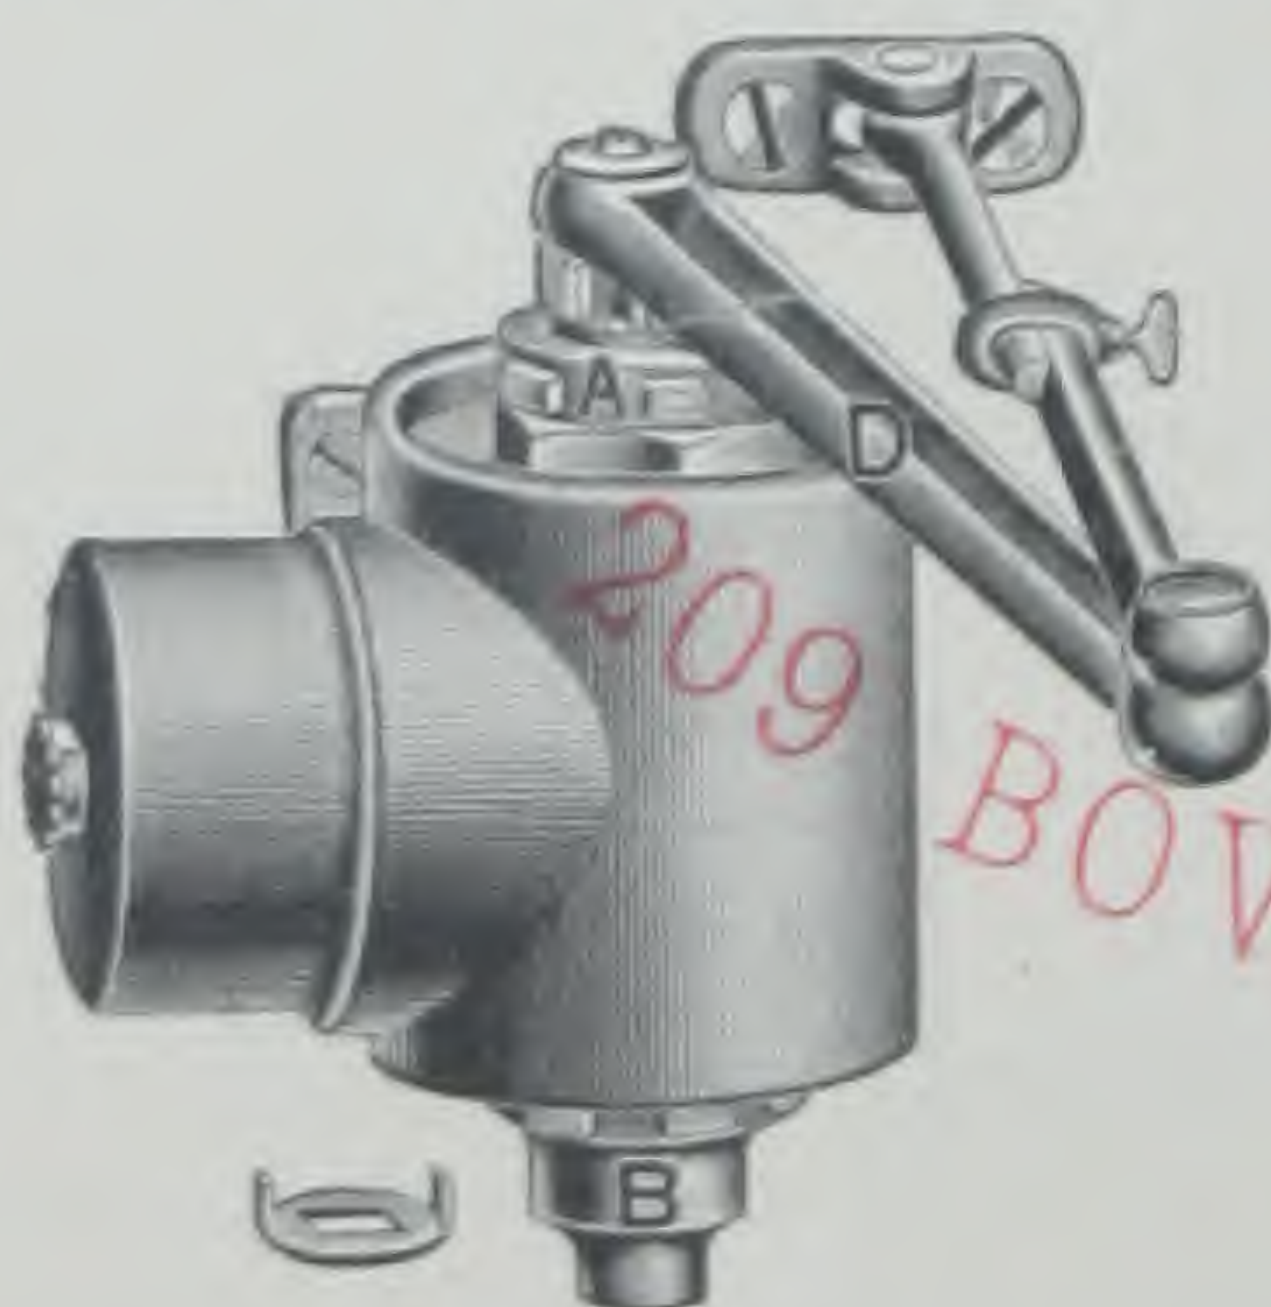

- EACH.
- No. 1. Suitable for doors not exceeding 3½ ft. in width by 8 in. in thickness, Nickel-plated . . . \$6 00
 - No. 2. Suitable for doors not exceeding 2 ft. 8 in. in width by 2 in. in thickness, Nickel-plated. . . 5 00
 - No. 3. Suitable for doors not exceeding 2 ft. 6 in. in width by 1½ in. in thickness, Nickel-plated, 4 00

In ordering these Springs, ascertain first the size you need, by consulting the above rules; then on which side of the door the Spring is to be used (THE HINGE SIDE OR OPPOSITE); if on hinge side, state how much, if any, the casing projects over the door where the Spring is to be attached, as we furnish an arm-bracket or extension to stand out the thickness of any casing up to three inches, if ordered with the Spring. Can be applied to either right or left-hand doors.

58

Cilfillan's Patent Door Checks and Springs.

& Co.

CHECK AND SPRING COMBINED.

CHECK ONLY. TO BE USED WITH SPRING HINGES.

This Spring and Check has TWO STEEL SPRINGS, one in each end of case, and is therefore SUITABLE for RIGHT and LEFT-HAND DOORS or JAMBS WITHOUT CHANGE.

EITHER SPRING can be USED ALONE or BOTH can be used at SAME TIME, making the RANGE OF POWER nearly DOUBLE that of any single spring machine of equal size. ONLY THREE SIZES are needed to meet all requirements, from the SMALLEST INSIDE to the LARGEST OUTSIDE DOORS.

SPRING CHAMBER and CHECKING CHAMBER are continuous, and BOTH FILLED WITH LIQUID, so that SPRINGS and BEARINGS are CONSTANTLY LUBRICATED.

In determining SIZE of SPRING AND CHECK to be used on OUTSIDE and VESTIBULE DOORS, STRONG WINDS and DRAUGHTS must be considered.

Under ordinary conditions the following will apply :

No. 1 is suitable for inside doors not over three feet wide ; and narrow outside doors.

No. 2 is suitable for largest inside doors ; and outside doors not over three feet wide.

No. 3 is suitable for the largest doors anywhere.

LUNDY PARLOR DOOR HANGER.

It has a single perfectly turned wheel directly over the center of the door, therefore the door always hangs plumb.

It has a sound insulated wheel; the door moves silently.

Its adjustments are above the door, therefore no plate either on edge or side of door is necessary to conceal the adjusting screw.

It is easily and quickly put on, as it requires no cutting of the door.

It has a guard to prevent jumping the track.

Its single, truly turned wheel travels upon a single track of $\frac{1}{4} \times 1\frac{1}{4}$ inch steel made straight and planed on the top edge, insuring the most perfect and easy movement of the door possible.
